

**Amendment under PCT Article 34**

received by the International Preliminary Examining Authority

on 28 December 2004.

**Amended Parts: Specification and Claims**

**Content of Amendments:**

**In the Translation of the Originally Filed Specification:**

- 1) The paragraph at page 5, lines 8-17, "An mobile apparatus according to the present invention ... are provided" is amended as follows:

"A mobile apparatus according to the present invention is a mobile apparatus comprising a broadcast receiving function for receiving a television broadcast, and a telephone communication function for performing a telephone communication, wherein an audio output device comprising a left-channel audio output unit and a right-channel audio output unit, and an audio processing circuit for outputting a left-channel signal of a television audio to the left-channel audio output unit and outputting a right-channel signal of the television audio to the right-channel audio output unit when a telephone communication is not performed and the television is viewed and listened to, the audio processing circuit further generating a monaural television audio signal from the left-channel signal and the right-channel signal of the television audio, outputting a monaural television audio using one of the left-channel and right-channel audio output units and outputting a telephone-received audio using the other audio output unit in the case of performing the telephone communication at the time of viewing / listening to the television, are provided."

- 2) The paragraph at page 5, lines 18-21, "A setting means for setting ... is preferably provided" is amended as follows:

"A setting means for setting which of the audio output units is used for outputting the television audio and the telephone-received audio in the case of performing the telephone communication at the time of viewing / listening to the television, is preferably provided."

- 3) The sentence at page 5, lines 22-25, "A sound volume ratio control means ... television, is preferably provided" is amended as follows:

"A sound volume ratio control means for controlling a ratio of sound volumes of the two audio output units in the case of performing the telephone communication at the time of viewing / listening to the television, is preferably provided."

- 4) The paragraph at page 6, lines 6-10, "A display device for displaying ... are preferably provided" is amended as follows:

"A display device for displaying a television image and a telephone-received image and a display control means for displaying both of the television image and the telephone-received image on the display device in the case of performing the telephone communication at the time of viewing / listening to the television, are preferably provided."

- 5) Claim 1 is amended as follows:

"A mobile apparatus comprising: a broadcast receiving function for receiving a television broadcast; and
